

# THE MOST DANGEROUS THING IN A KITCHEN IS AN UNTRAINED EMPLOYEE

From cuts and burns to slips and falls, restaurants present numerous dangers to an often inexperienced workforce. One in 20 on-the-job injuries and illnesses worldwide occur in food service establishments.

(QSR Magazine)

## Top 4 FOODSERVICE INJURIES

- 1| LACERATIONS AND PUNCTURES
- 2| BURNS
- 3| SPRAINS AND STRAINS
- 4| EYE INJURIES

(Cintas Corporation Report)

## \$TATS

**For every \$1 invested in  
workplace safety and  
health, employers see a  
\$4 to \$6 return.** (OSHA)

---

# 1

Number of seconds for a 3rd degree burn to occur without proper protection at 155 °F / 68 °C

---

# 60%

Reduction in risk of hand injury if wearing proper protection

---

# \$34,000

Additional sales needed to cover the cost of a \$1,700 employee injury at a 5% profit margin

## \$AFETY PAYS

The costs to react to workplace injuries and illnesses far exceed the costs to prevent them from happening in the first place.

Founded in 1986, Tucker Safety Products is the leading manufacturer of personal protective equipment (PPE) and apparel for commercial foodservice operations worldwide. At Tucker Safety, we combine our depth of knowledge and expertise with advanced design and manufacturing technologies to provide high quality, reliable safety solutions that help businesses reduce injury and worker's compensation claims, increase productivity, and achieve lasting safety improvements. Our success is driven by our people and their dedication to excellence – in our products, in our expertise, and in our relationships with customers and end users.

Workplace injuries are costly, painful and **PREVENTABLE**. We offer the highest quality products with the lowest cost of ownership. **Invest in your people. Invest in your PPE.**

**A BURN SHOULDN'T BE A BADGE OF CULINARY HONOR.**

**?**  
**DID YOU  
KNOW?**

The restaurant industry suffers over **1/3** of all reported workplace burns — more than **12,000** a year. (The Burn Foundation)

**Less than 20%** of food service burns come from direct heat contact. Most injuries occur from **boiling water, steam, hot oil** or **grease**.

**17.5:** Average number of days an employee will miss in recovery after suffering a burn

#### **NSF CERTIFIED**

Most Tucker Safety BurnGuard® oven mitts, gloves and hot pads are NSF certified for use in the commercial foodservice industry. The NSF P149 protocol addresses the heat resistance, wet and dry thermal protective performance, flame resistance, durability and cleanability of these items.

Our bestselling oven mitt comes with three different outer shell fabric choices and GussetGuard™ protection for added durability and dexterity; ideal for general purpose cooking.

- VaporGuard® barrier provides protection from hot liquids, grease, steam and vapors.
- Removable liner series provides additional sanitation and increased product life. Liner is held in place with hook and loop fastener and can be separately cleaned and dried.
- Temperature protection up to 450°F / 232°C
- Protects even when wet!

**GussetGuard™**  
Specially designed insert,  
placed between the thumb  
and index finger on all  
conventional style mitts  
for added durability and  
dexterity.

## CONVENTIONAL STYLE MITTS All have VaporGuard® barrier

### Poly-Cotton Conventional Style Oven Mitt

Durable poly-cotton outer shell withstands repeated washings without losing any protective qualities. Machine washable.

## Anatomy of Thermal Protection

1

### EFFECTIVE LIQUID/VAPOR BARRIER

VaporGuard® is Tucker Safety's proprietary effective liquid and vapor barrier, and it's part of every glove in our BurnGuard® family. This material prevents hot liquids (boiling water, hot oil, and grease) from reaching the skin of the wearer. It will not burn, melt, crack, turn brittle or break down when exposed to 500°F temperatures for extended periods of time.

2

### INSULATION

This is the thick interior padding between the outer fabric shell and the interior liner, which absorbs the heat before it passes through to the body.

3

### OUTER SHELL FABRIC

Helps determine durability and lifespan of the protective apparel. If the outer shell fabric is made from Nomex® or Kevlar® fiber, it can provide additional heat and flame resistance.

## SPECIALTY STYLES: 3, 4 & 5 Finger Style

Three, four & five-finger gloves offer greater dexterity for specific job tasks, handling equipment parts or turning knobs without needing to remove gloves.

- VaporGuard® barrier provides protection from hot liquids, grease, steam and vapors.
- Removable liner series provides additional sanitation and increased product life. Liner is held in place with hook and loop fastener and can be separately cleaned and dried.
- Temperature protection up to 450°F / 232°C; Kevlar® fiber styles protect up to 650°F / 343°C.

### Poly-Cotton with Kevlar® Fiber Hand Three-Finger Plus Gloves with Removable Liner

Poly-cotton three-finger gloves with Kevlar® fiber provides protection when exposed to ultra-high temperatures and/or open flames. Removable liner for ease of cleaning and maximum sanitation. Machine washable. Sold in pairs.

LENGTH	ITEM
18"	57187

Caution: Do not use outer shell or liner alone.

### QuickKlean™ Three-Finger Plus Gloves

## Aprons & Accessories

### BurnGuard® Aprons with VaporGuard® Barrier

- Protects wearer from injuries associated with steam, liquid and chemical splatters/splashes, boiling water, hot oil and grease.
- Neck and waist straps are sewn into apron body for added durability.
- Safe to use, wet or dry.

#### QuickKlean™ Apron with VaporGuard® Barrier

Highly durable nylon fabric with QuickKlean™ finish wipes clean in your operation, no machine washing required. Lightweight and comfortable to wear for extended periods, apron is impervious to hot liquids, grease, or steam. Great for fryer filtering or washing dishes.

LENGTH	ITEM
36"	50362
42"	50422

#### Head Gear with Face Shield

Full face protection with unimpeded full line of sight, adjustable head band and face shield that can pivot forward and backward. Easy to clean, lightweight to wear. Sold as case of 10 each.

DESCRIPTION	ITEM
Head Gear with Face Shield	99942

#### Apron with Nomex® Fiber

Highly durable Nomex® fiber for added protection when working around open flame.

LENGTH	ITEM
36"	10360

#### ShinGuard™ Protectors with QuickKlean™ Finish

Secured with elastic boot/shoe strap and sewn in hook and loop fastener tabs to keep protectors in place. Eliminates need for special boots in multiple sizes. Sold in pairs. Fits all shoe sizes.

LENGTH	ITEM
18"	51182

#### Poly-Cotton Apron

Poly-cotton material offers complete protection when not working with open flame. Liquid/vapor barrier keeps the wearer dry.

LENGTH	ITEM
36"	50360

# Full Body Protection Kits

- Full body (head to toe) protection from hot liquid, grease, steam, vapors and/or chemicals associated with tasks such as fryer filtration and washing pots and pans.
- Lightweight design reduces fatigue and promotes use. Rinses clean!
- Each piece is easy to put on and remove.
- Long lasting construction reduces replacement costs.

## QuickClean™ Full Body Protection Kits

QuickClean™ products wipe clean, no machine washing required.

### Head Gear with Face Shield

Full face protection with unimpeded full line of sight, adjustable head band, pivots forward and backward. Easy to clean, lightweight to wear.

### SteamGlove™ Utility Gloves

Watertight, submersible, and knit-lined. SteamGuard™ barrier offers excellent protection from a wide array of chemicals, hot water and liquids that can pose a danger. 20" length protects full arm. Material composition is FDA 21 CFR, parts 170-199 compliant making it ideal for food handling and preparation. Easy clean at the sink.

- Abrasion Resistance Tested: Level 5
- Puncture Resistance Tested: Level 2
- Cut Resistance Tested: Level 1

### QuickClean™ Apron

Constructed of durable nylon with VaporGuard® barrier. Lightweight and comfortable to wear for extended periods. Length: 36 inches.

### ShinGuard™ Protectors with QuickClean™ Finish

Constructed of durable nylon. Features VaporGuard® liquid/vapor barrier. Protects lower legs and feet, keeping the wearer safe and dry. Eliminates need for special boots in multiple sizes and maintains slip resistance if wearing slip resistant shoes.

## Product Selection and Care

### The “Tucker Difference”

We are the only manufacturer in the industry to offer oven mitts and gloves in small, medium and large sizes. Even though our standard size is medium; you can order a smaller or larger size mitt or glove by requesting the same style number in small or large.

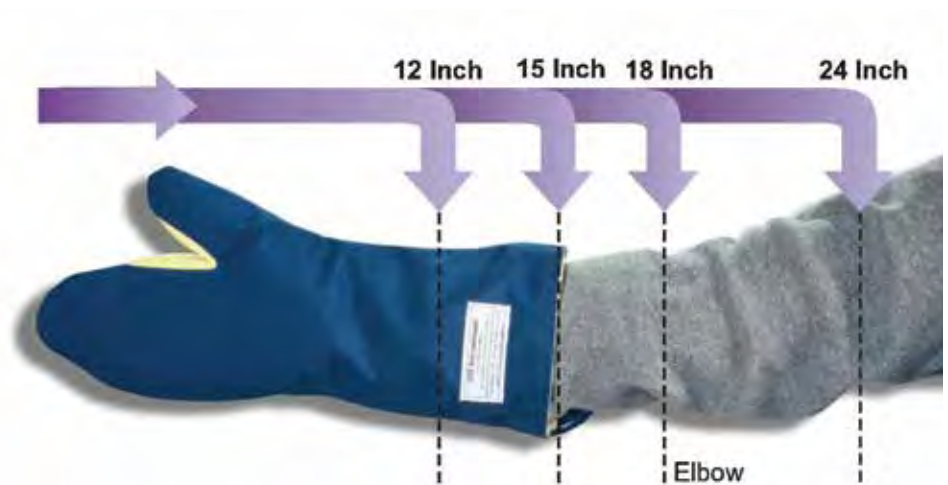

Different from cheap commodity products, every Tucker Safety product can be effectively washed and sanitized without losing any protective qualities. Every BurnGuard® product is equipped with our proprietary VaporGuard® barrier and **keeps working whether the mitt or glove is wet or dry**. “Clean-as-you-go” throughout the day for maximum sanitation and to save time.

### Mitt and Glove Sizing: Getting the Proper Fit

Protective apparel and equipment that fits properly is vital to the safety of the wearer. Knowing how to measure and choose mitt or glove sizes can increase safety and productivity. To avoid injury and promote use/compliance, choose more than one size to accommodate different wearers.

**A one-size-fits-all approach is simply ineffective.**

Mitts or gloves that do not fit properly delay work and can result in hand injuries. Ones that are too small can cause hand fatigue or decrease dexterity. Ones that are too large can get caught on jagged edges or moving parts of equipment and can be easily pulled off. Choose the length of mitts and gloves based on application, job task or equipment type. Typically, 15- or 18-inch lengths will meet the majority of your needs.

### Caring For Your Mitts and Gloves

All our protective apparel is completely washable and dryable. For operations where commercial laundering equipment is not available, our innovative QuickKlean™ Protective Apparel is designed to be washed, rinsed, and sanitized as often as necessary by hand at the sink.

Our protective apparel with poly-cotton or Nomex® fiber outer shells are best maintained through commercial laundering.

## Safety Stations

### Cleaning Tips

- Clean daily using warm soapy water for hand washing or normal setting for machine washing.
- If hand washing, thoroughly rinse before sanitizing with an approved foodservice sanitizing agent.
- Always clean both the exterior and interior of your Tucker Safety Products mitt or glove; interior liners are often forgotten and can be a significant source of cross-contamination if they are not washed and sanitized daily.
- Use a soft scrub brush to remove excess soil.
- For oven mitts with sewn in liners, turn the mitt inside out for faster drying.
- For oven mitts with removable liners, remove liner to wash; machine dry or hang on a Safety Station to air dry.
- **Once dry, reinsert liner into outer shell. Do NOT use outer shell or liner alone.**

PPE that is accessible and properly stored promotes compliance by eliminating last minute scrambling to find safety equipment; helps maintain a structured and sanitary environment; and delivers savings to the bottom line through reduced workplace injuries and avoiding premature replacement costs for missing or damaged PPE.

**Our Safety Stations are ideal for commercial foodservice operations:**

- Constructed of non-absorbent materials that will not rust or oxidize
- Images or information are designed not to chip or flake
- Mounting hardware withstands the rigors of a commercial kitchen environment
- Safety Stations can be easily removed for cleaning and remounted
- Easily customizable

### Safety Stations

Wall mounted equipment station to hang safety items. Mounting hardware included.

<b>4-Hook Safety Station 14" x 6"</b>	99954

## An Essential Investment

Cut protection is a vital component of any kitchen safety program. To be effective, cut resistant gloves should achieve the right balance between protection against hazards, dexterity, grip, touch sensitivity, durability and comfort. Our KutGlove™ and Whizard® cut resistant gloves were designed with the end-user in mind. Rapid advancements in yarn technology allow us to create better performing gloves for foodservice applications, without sacrificing dexterity or adding bulk. And, in an environment where PPE is often shared by others, our gloves have been third-party tested and proven to be machine washable without losing their cut resistance or antimicrobial properties.

### KutGlove™, Color-by-Size

- Wire-free and designed to ensure fingers go all the way to the tip of the glove for touch sensitivity and dexterity
- Spectra® and Dyneema® fibers provide high levels of protection and unparalleled comfort
- Non-absorbent food/medical grade materials approved for direct food contact
- Yarn/fibers feature inherent antimicrobial protection that will never wash or wear out; NSF-certified, under Standard 51 for food equipment and materials
- CE tested and ANSI certified level A4 (13-gauge) and level A5 (10-gauge) cut resistance
- Can be repeatedly washed and sanitized, bleach and sanitizer safe

KutGlove™ Cut Resistant Gloves are color-coded to aid in size identification (i.e., red band = small), application, kitchen zone, or to support HACCP programs.

**SIZES:** XS-XL (XXS and XXL available as special-order request)

**COLORS:** Yellow, Red, Green, Blue, Tan and White—

or can be ordered by color-coded band size:

**XS** (yellow band), **S** (red band), **M** (green band), **L** (white band), **XL** (tan band)

**Pack Size:** 1 each, Ambidextrous

## Understanding Cut Resistance

Cut resistance is measured by the amount of weight (in grams) required to cut through fabric. Test results are then categorized into different cut levels: A1-A9 for the new ANSI cut levels and A-F for the new European Norm (EN) 388 cut levels. While cut resistance is important and is what makes cut resistant gloves suitable for protecting against cuts or lacerations, other factors such as flexibility, comfort, thickness and intended application should also be considered.

### KutGlove™ Stretch Fit, Color-By-Size

- Plaiting for unparalleled comfort, feels like a second skin
- Form-fitting, stretch fit
- Non-absorbent food grade fibers with antimicrobial protection
- ANSI Cut Level A4
- CE tested and certified level 5 cut resistance

**Tucker Safety Products KutGlove™**  
and Whizard® Cut Resistant Gloves are  
cut and puncture **RESISTANT**.

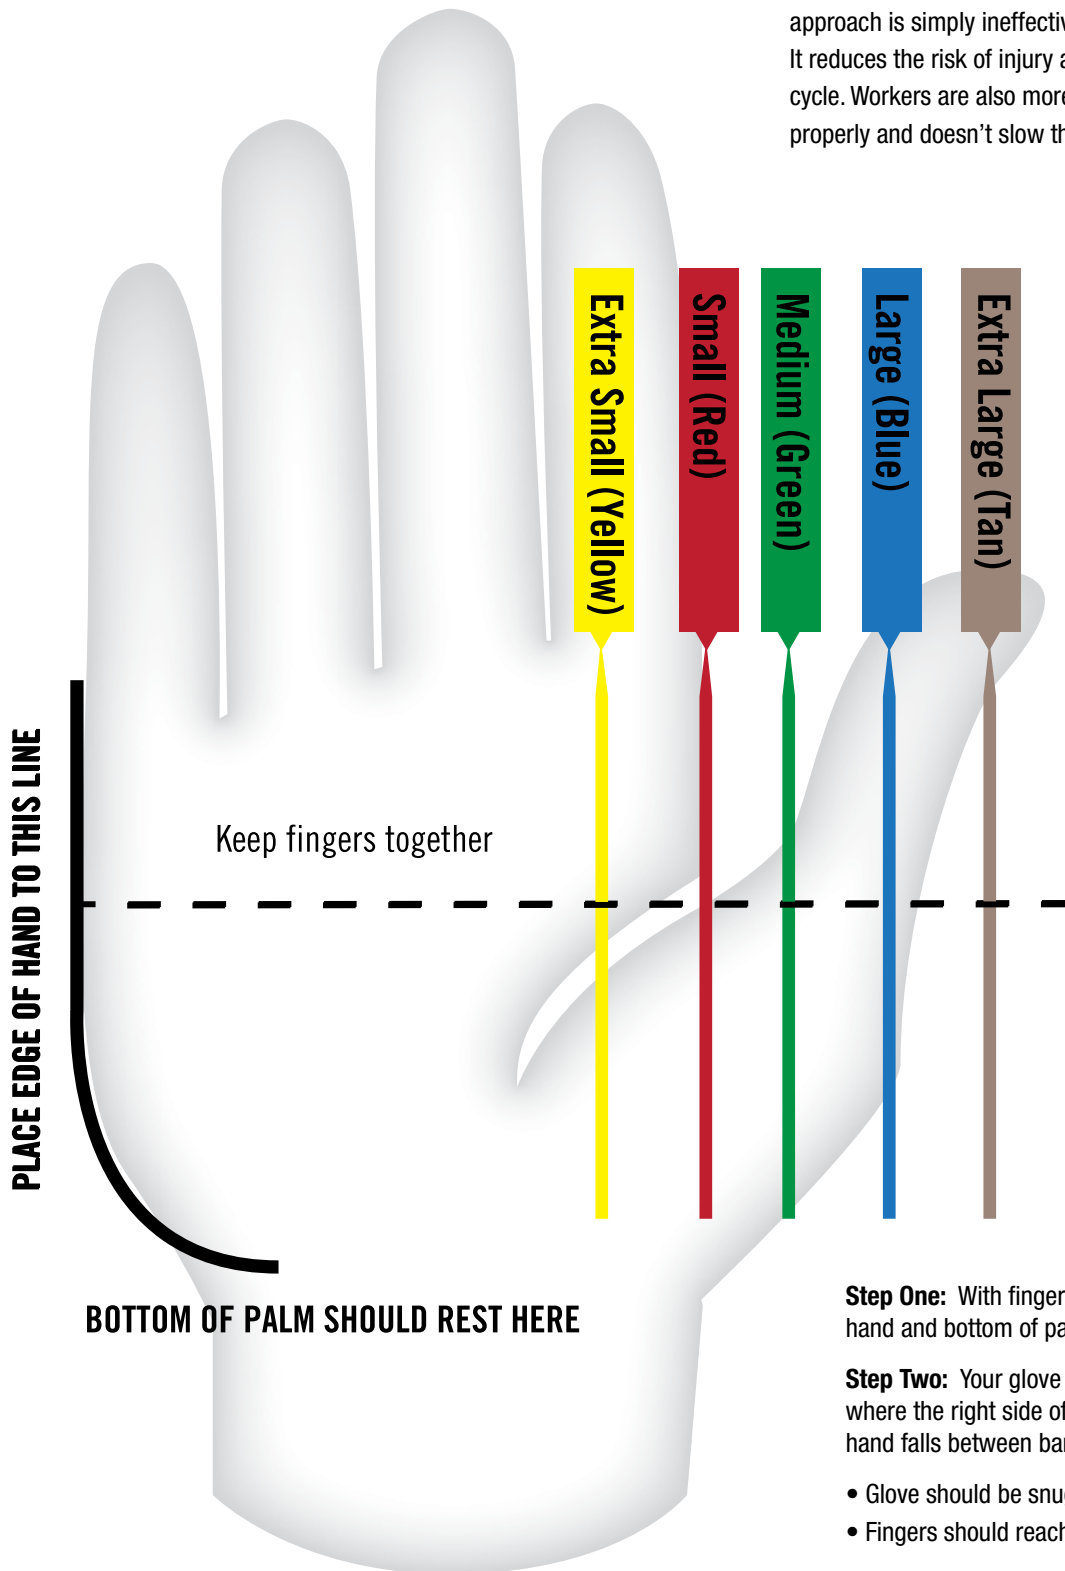

**NOT CUT AND PUNCTURE PROOF.**

**Do NOT use with moving or serrated  
blades or tools.**

# Sizing Guide for KutGlove™ Cut Resistant Gloves

**NOTE:** Drawing is to scale

Hands come in all shapes and sizes. A one-size-fits-all approach is simply ineffective. **Correct fit is very important!** It reduces the risk of injury and ensures a longer product life cycle. Workers are also more likely to wear a glove that fits properly and doesn't slow them down.

*Clean and  
sanitize gloves  
after use for  
maximum  
sanitation.*

**Step One:** With fingers together, place hand so left side of hand and bottom of palm rests on black line.

**Step Two:** Your glove size is determined by the color bar where the right side of your hand rests. If the side of your hand falls between bars, select smaller size.

- Glove should be snug, not tight.
- Fingers should reach completely to the end.

Tucker Safety Products KutGlove™ and Whizard® Cut Resistant Gloves are cut and puncture resistant. NOT CUT AND PUNCTURE PROOF. Do NOT use with moving or serrated blades or tools. This chart is for general information purposes only and is not a substitute for review of the applicable government regulations and standards or individual application or use. It should not be construed as legal advice or opinion.

## Utility

### Utility Gloves

- Supported nitrile utility glove for maximum hand protection from solvents, oils, grease, and cleaning products
- Textured finish for confident grip in wet or dry applications
- FDA CFR 21 compliant for direct food contact
- 100% cotton interlock lining for comfort and durability
- Temperature protection up to 225°F / 107°C
- Sold in packs of six pair

#### 14" Length

APPLICATIONS: Cleaning steam table bays, grill surfaces, griddle surfaces or hot holding equipment.

SIZE	ITEM
<b>S</b>	92142GR
<b>M</b>	92143GR
<b>L</b>	92144GR
<b>XL</b>	92145GR

#### 20" Length

### PlatenGlove™ Nitrile Utility Glove

- Grey nylon knit shell glove construction creates a high level of flexibility and dexterity
- Black nitrile coating withstands exposure from liquids, diminishing hand irritants
- Knit wrist construction
- CE Level 1 cut resistance level
- Sold by the dozen pair

APPLICATIONS: Cleaning tasks, lower temperature, wet/messy applications.

SIZE	ITEM
<b>M</b>	63613-M
<b>L</b>	63613-L
<b>XL</b>	63613-XL

# Product Selection Guide

This guide has been developed to help select the most appropriate PPE based on application/job task, equipment type, potential hazards and/or risks that may require protective apparel. It is for general information purposes only and is not a substitute for review of the applicable government regulations and standards or individual application or use. It should not be construed as legal advice or opinion. Contact Tucker Safety Products for more details and information based on specific needs.

## STEPS

- 1 | Identify equipment type.**
- 2 | Match potential hazards/risks listed for each piece of equipment with the hazard assessment you performed for your specific equipment/environment.**
- 3 | View our top picks and select appropriate protective apparel.**  
Many of our products can be ordered with either our standard finish (machine washable and dryable), or our QuickKlean™ finish. If commercial laundering equipment is not practical or available, choose products with a QuickKlean™ finish for cleaning ease and maximum sanitation.

*Use of manufacturer's equipment images does not constitute endorsement of Tucker Safety Products' recommended solutions or products. Product recommendations are intended for generic applications. Consult your local Tucker Safety Products representative for a comprehensive assessment of personal protective equipment needs based upon application and environment.*
